

## CFT ePAYMENT: THE GLOBAL PAYMENT GATEWAY FOR HIGH-VOLUME ECOMMERCE CLIENTS

The growth of Mobile and eCommerce markets is challenging the ability of many organizations to handle real-time payments in a consistent and cost-efficient manner. Delivered as a fully managed and competitively priced cloud service with a focus on security, performance and flexibility, ePayment is the global payment gateway for high-volume eCommerce clients. Able to handle real-time authorization and capture for worldwide sales, ePayment increases the potential for higher online conversion rates and increased revenue.

### Proven security

Leveraging the CFT Tokenization service, ePayment achieves PCI DSS 3.1 level 1 compliance – the highest compliance rating available for the secure storage and handling of sensitive data. 3D Secure is also supported (“Verified by Visa” and “Mastercard SecureCode”).

### Worldwide Markets

ePayment supports major payment methods and acquirers, along with multiple market and currencies. Built on the newest application technology and infrastructure, it delivers highly advanced, linear scalable and secure operation 24/7.

### Easy System Integration

Integrating into client systems through standardized Web

Services and Web pages, the design is fully configurable by the client and supports multiple languages. Adaptive processing provides the flexibility to quickly meet client and industry specific interfaces and requirements.

### Additional key features include:

- ⌚ Comprehensive online administration and reporting options
- ⌚ Frequency configurable capture, allowing for batch captures to match sales market reports and optimize cash flow
- ⌚ Client defined capture files may also be transferred via SFTP for full control
- ⌚ Optional transfer of sales related-data to acquirers for post-administration purposes (e.g. travel management systems)
- ⌚ Reversal and Refunds fully supported
- ⌚ Test environment and extensive documentation available for developers when integrating with ePayment
- ⌚ Amadeus Altea and e-Retail integration available
- ⌚ Airline industry capture file standard (CCSP) support

## About CeleritiFinTech

CeleritiFinTech, an HCL DXC Technology Company, is a banking software and services company that delivers digital software and services to global banking clients. This innovative enterprise helps banking clients globally extend investments in existing platforms and implement innovative

solutions that combines people, technology, process and services to accelerate growth. CeleritiFinTech (CFT) invests in platform modernization and product functionality enhancements to capitalize on the proven capabilities of both parent companies in addressing the multi-billion-dollar, global core banking software market.
